FULLTEC
THE NATURE COMPANY

ABOUT FULLTEC

Fulltec is an internationally operating company with clients in over thirty countries.

Originally established in Switzerland in 1998, the company consolidated its expertise in Salzburg in 2012 to ensure sustainable and direct management of its two Active Substance dossiers at the European level.

Still primarily family-owned, Fulltec produces insect repellents and pesticides based on its own biocidal Active Substances for renowned brand customers throughout Europe.

www.fulltec.at

Active Substances:

Eucalyptus citriodora oil (H/C) and Geraniol

For use as a concentrate to manufacture repellent products (Eucalyptus oil) or to produce EU-compliant, insecticidal biocidal products (Geraniol).

Finished products are produced in the following segments:

- Insect protection
- Household insecticides
- Pet care products
- Pediculicides

Fulltec stands for environmentally friendly pest control from Austria, with a focus on biocidal products that respect life and nature.

We combine effectiveness with sustainability and emphasize fairness, from the selection of our suppliers to transparent pricing. Innovation and environmental protection are at the core of our actions.

USP & CUSTOMER BENEFITS

Pan-European approval, research and development, as well as production and distribution of two nature-based biocidal Active Substances (Eucalyptus citriodora oil (H/C) and Geraniol) operated by a small company from Salzburg. After the completion of the approval process, Fulltec's customers can market biocidal products in Europe for ten years, supported by scientific data and insights from the Active Substance dossier provided by Fulltec.

EC OIL (H/C)

Extracted from the leaves of the Corymbia citriodora plant using steam distillation and refined into the biocidal Active Substance Eucalyptus citriodora oil through a patented hydration/cyclization process.

- The only nature-based repellent Active Substance notified in Europe
- In notification by Fulltec for PT 19
- Concentrate for the production of repellent products
- Efficacy and safety confirmed through numerous laboratory and field tests
- Fulltec reference formulation without labeling requirements
